PO Box 503
Lynchburg, TN 37352*

Well User Agreement

In accordance with Metro Utility Department's cross connection control program, a private well or auxiliary water source may not be connected in any manner to the public water supply unless proper protection against cross connection is provided. Only Reduced Pressure Backflow Preventers that are approved may be used for protection. These devices must have prior approval by the Metro Utility Department. Customers not in compliance with this rule will have their water service discontinued.

- This serves as notification that a well is located on the property at the following address:
- This serves as notification that a well is NOT located on the property at the following address:

Address:

I (we) understand and agree that this system is, and shall remain totally segregated from the public water supply, and no unapproved or unauthorized cross connections, auxiliary intakes, bypasses, or interconnections will be permitted without the written approval of the Metro Utility Department.

I (we) further understand and agree that should an auxiliary water supply be connected to the public water system at the above address, maximum cross connection control equipment in the form of an approved reduced pressure backflow prevention device shall be installed to protect the public water supply.
